

## Instructions to authors

The *Boletín de Geología*, the scientific journal of the School of Geology at Universidad Industrial de Santander, is an international publication intended for original and high quality studies in the geosciences.

## Submission of Papers

The *Boletín de Geología* allows sending items in any of the following options:

1. Perform sending by journals platform  
<http://revistas.uis.edu.co>.
2. Send the documents to the any of the following emails: [bolgeo@uis.edu.co](mailto:bolgeo@uis.edu.co),  
[boletindegelogia.uis@gmail.com](mailto:boletindegelogia.uis@gmail.com)

Luis Carlos Mantilla Figueroa  
Editor, Boletín de Geología  
Escuela de Geología  
Universidad Industrial de Santander

Papers should be written in Spanish, English or Portuguese. Submission of a paper implies that it has not been published previously, that it is not under consideration for publication elsewhere, and that if accepted it will not be published elsewhere in the same form, in Spanish or English or any other language.

## Preparation of the manuscripts

**General:** if it is possible, authors are recommended to check a recent edition of the journal to review styling of the publication. The document must be done using word processor, in letter size, double-spaced with margins of 3.0 cm (top and left) and 2.5 cm (bottom and right), in Times New Roman, size 12. The work pages are not numbered.

**Paper Length:** papers should not be up to 35 pages, including tables and figures, although in special circumstances longer papers will be considered.

**Text:** papers should be typed according to the following order: Title in English, author's name(s) and surname(s), affiliation(s), e-mail address and ORCID of each of the authors. Abstract (not exceeding 300 words) and up to six keywords. Title in Spanish, *resumen* and *palabras clave*, which will be followed by the main text, including introduction, theoretical framework, methodology, results, discussion, concluding remarks, acknowledgements and references. The title should be short, precise and informative. The corresponding

author should be identified with a number and footnote, no other footnotes should be used. The *resumen* and the abstract should express the nature of the research work and contain the most outstanding conclusions in a single paragraph.

**Units, symbols and abbreviations:** International System of Units (SI) should be used. Only internationally agreed abbreviations should be used.

**References:** In the text refer to the author's surname, followed by year of publication; for example, «According to Whitney (1998), the tectono-metamorphic evolution...» or «...with results obtained later (Spear, 1998)». For two authors use their surnames, separated by 'and', followed by year of publication; for example, «...according to Prigogine and Defay (2002)» or «...recently reported by different authors (Schairer and Yorder, 2003)». For three or more authors use the surname of the first author followed by «*et al.*» and year of publication; for example, «Soares *et al.* (2001) have determined...» or «...diffusive homogenization of originally zoned garnets (e.g., Tracy *et al.*, 2004)».

Oral communications should be cited in the text, by referring to the author's surname (with initials of the name), followed by «oral communication»: (Medina, L., oral communication). Manuscripts under review should be cited in the text, by referring to the authors' surname, followed by «manuscript under review»: (Fernandez *et al.* manuscript under review). Manuscripts in print should be cited in the text, by referring to the authors' surname, followed by «in press»: (Vargas and Reyes, in press).

All publications cited in the text should be presented in a list of references following the acknowledgements. It should be arranged alphabetically by authors' surnames. Several references from the same author should be organized chronologically and distinguished by a, b, c,... after year of publication (for the same year of several publications). Journal names should be spell out completely. In the case of theses, the granting institution and their location should be given. In the case of references of papers presented (and published) in scientific meetings, the title of the paper, complete name of the event, place, date and number of pages within the memoirs should be included. Avoid the inclusion of references published only as abstracts.

References should be carried out as shown in the examples given below, according to the international

APA standard and include at the end of each reference the type of document and its respective link for verification.

### **Books**

ASTM D287. 2006 Standard Test Method for API Gravity of Crude Petroleum and Petroleum Products (Hydrometer Method). Internacional. (technical standards) [link]

**Illustrations:** The illustrations (photographs, maps and diagrams) are all to be referred to as 'Figure', followed by the corresponding arabic number. All illustrations should have high-resolution and suitable for their reproduction. Each illustration should be cited in numerical order of appearance in the text. The illustrations are to have a caption in the lower part, following the word Figure and the corresponding arabic number. They should be fixed to the page margins. Maps must have a maximum size of 17 cm x 22 cm. Photographs that are submitted digitally should be saved at the minimum resolution 1000\*1000 pixels at the scale of final printing. Resolution/scanning: Photographs should be imaged at a minimum of 300 dpi and saved as jpg. Authors should avoid colors that do not properly print in black and white.

**Tables:** The tables are all to be referred to as 'Table', followed by the corresponding arabic number. All tables should be carried out as Word or Excel files, and suitable for their reproduction. Each table should be cited in numerical order of appearance in the text. The tables have a caption in the upper part, following the word Table and the corresponding arabic number. They should be fixed to the page margins. Footnotes to tables should be typed below the table and should be referred to by superscript lowercase letters. Authors should avoid colors that do not properly print in black and white.

The figures and tables must be referenced within the text, before being presented. Decimals must be separated by dots if the article is written in English and commas if the article is written in Spanish.

**Acceptance:** Papers will be reviewed by the Editorial Board in order to verify that they follow the instructions, to the authors of the review *Boletín de Geología*. Papers that do not follow them will be

returned to the author(s) for corrections. The articles will be evaluated for at least two referees. If both of them agree to reject the paper, this will not be accepted again for publication in the *Boletín de Geología*. If only one referee rejects the paper, the Editorial Board will select a third evaluator and from his (her) concept a final decision will be taken.

The results of the review will be communicated to the author(s) for making the corresponding modifications, if necessary. The names of reviewers will remain anonymous except although they want to reveal their names. In the last case, is expected that authors mention their names in the Acknowledgments. Papers submitted to the *Boletín de Geología* will be accepted for publication only when authors have fully reviewed and corrected the manuscript following the recommendations of the referees.

**Publishing Policy:** After the acceptance of the papers for publication, the manuscript will be revised by the Editorial Board if is necessary. No charge will be make for publication of any paper, if the printed pages are within the limit specified above. None of the submitted manuscripts, including text, figures and tables, will be sent back to the author(s) to minimize the work load on the editorial staff after the paper be accepted for publication. All ideas expressed in the papers of this review are only responsibility of their author(s).

**Copyright:** Once your paper has been accepted, all authors must sign the “Transfer of Copyright” agreement. By this agreement the *Boletín de Geología* journal protects rights authors.
